25010 BASIC ELECTRICAL REQUIREMENTS

All electrical systems shall be properly protected and the service equipment shall be so installed as to be accessible from the outside of the building. All electrical systems shall be designed and installed in accordance with the National Electrical Code, NFPA 70-1999, and all local codes and ordinances. All electrical systems shall be equipped with appropriate fuses or circuit breakers and shall be protected against overcurrent. All electrical systems shall be properly grounded and bonded according to the National Electrical Code, NFPA 70-1999, and all local codes and ordinances. All electrical systems shall be properly labeled and marked to indicate their function and location. All electrical systems shall be properly maintained and tested on a regular basis to ensure their safe and efficient operation.

25012 GROUNDING AND BONDING FOR ELECTRICAL SYSTEMS

All electrical systems shall be properly grounded and bonded according to the National Electrical Code, NFPA 70-1999, and all local codes and ordinances. All electrical systems shall be equipped with appropriate grounding and bonding conductors and shall be protected against overcurrent. All electrical systems shall be properly grounded and bonded according to the National Electrical Code, NFPA 70-1999, and all local codes and ordinances. All electrical systems shall be properly labeled and marked to indicate their function and location. All electrical systems shall be properly maintained and tested on a regular basis to ensure their safe and efficient operation.

25030 LOW VOLTAGE ELECTRICAL POWER CONDUCTORS AND CABLES

All electrical systems shall be properly protected and the service equipment shall be so installed as to be accessible from the outside of the building. All electrical systems shall be designed and installed in accordance with the National Electrical Code, NFPA 70-1999, and all local codes and ordinances. All electrical systems shall be equipped with appropriate fuses or circuit breakers and shall be protected against overcurrent. All electrical systems shall be properly grounded and bonded according to the National Electrical Code, NFPA 70-1999, and all local codes and ordinances. All electrical systems shall be properly labeled and marked to indicate their function and location. All electrical systems shall be properly maintained and tested on a regular basis to ensure their safe and efficient operation.
